What is the easiest way to keep track of Facebook user info? I'd like to be able to connect my Facebook user to my ASP.NET MVC2 site. In this way, my user can log in and still be able to view Facebook pages. So what's the easiest way to do this? Right now, I'm trying to use my Facebook account as a test login and it works. However, in order to do this, I have to remember to log out of my Facebook account (and do this every time I change between my work and home 82157476af
